Outline

1. Introduction
2. Objectives
3. Homepage
4. Restaurants' view
5. Navigation
6. Personal profiles/User Profiles
7. Payment Method
8. Development
9. Conclusion

1.Introduction

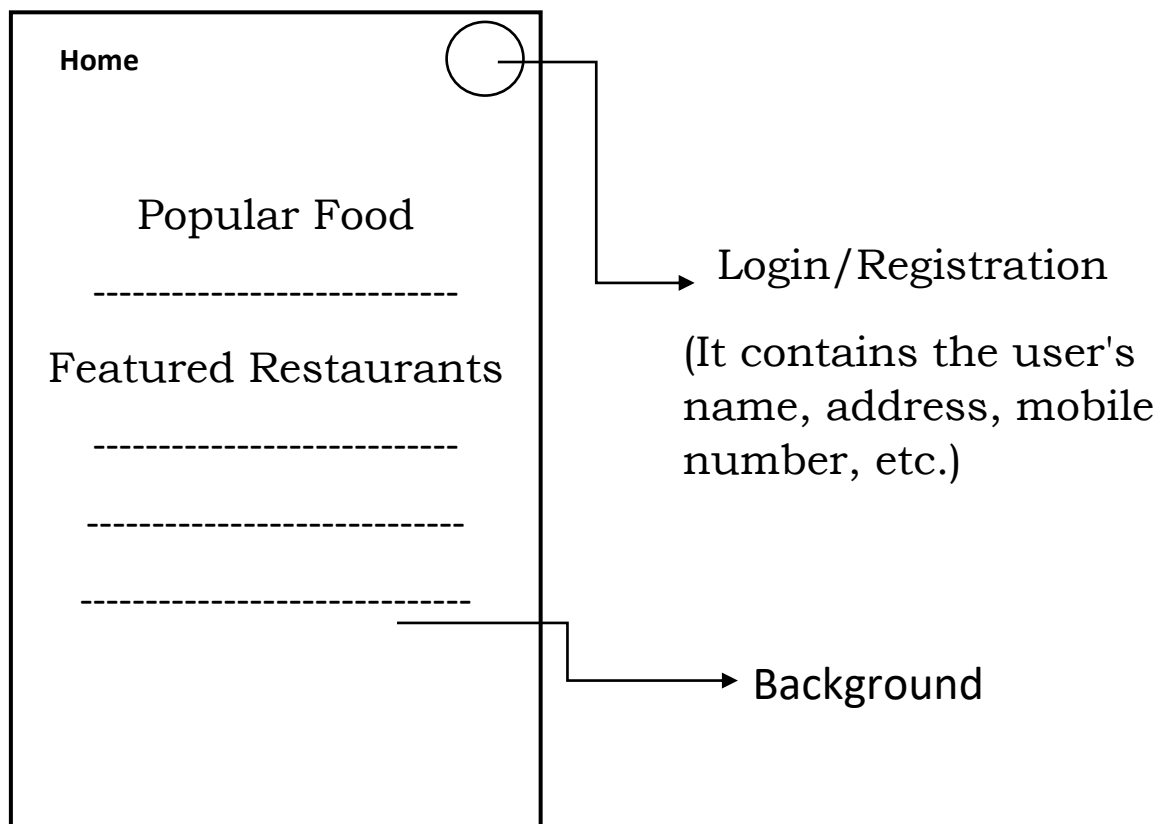

The “**Local Dine-in Android Apps**” project is developed in the JAVA language. Which mainly focuses on the basic operations of local restaurants. Using this we can quickly get food in our home.

2. Objectives

- o It provides better and more efficient service.
- o Reduce time loss for ordering food online.
- o Provide facility for proper monitoring, reduce time loss and provide data security.
- o All restaurant details will be available with a click of the user.

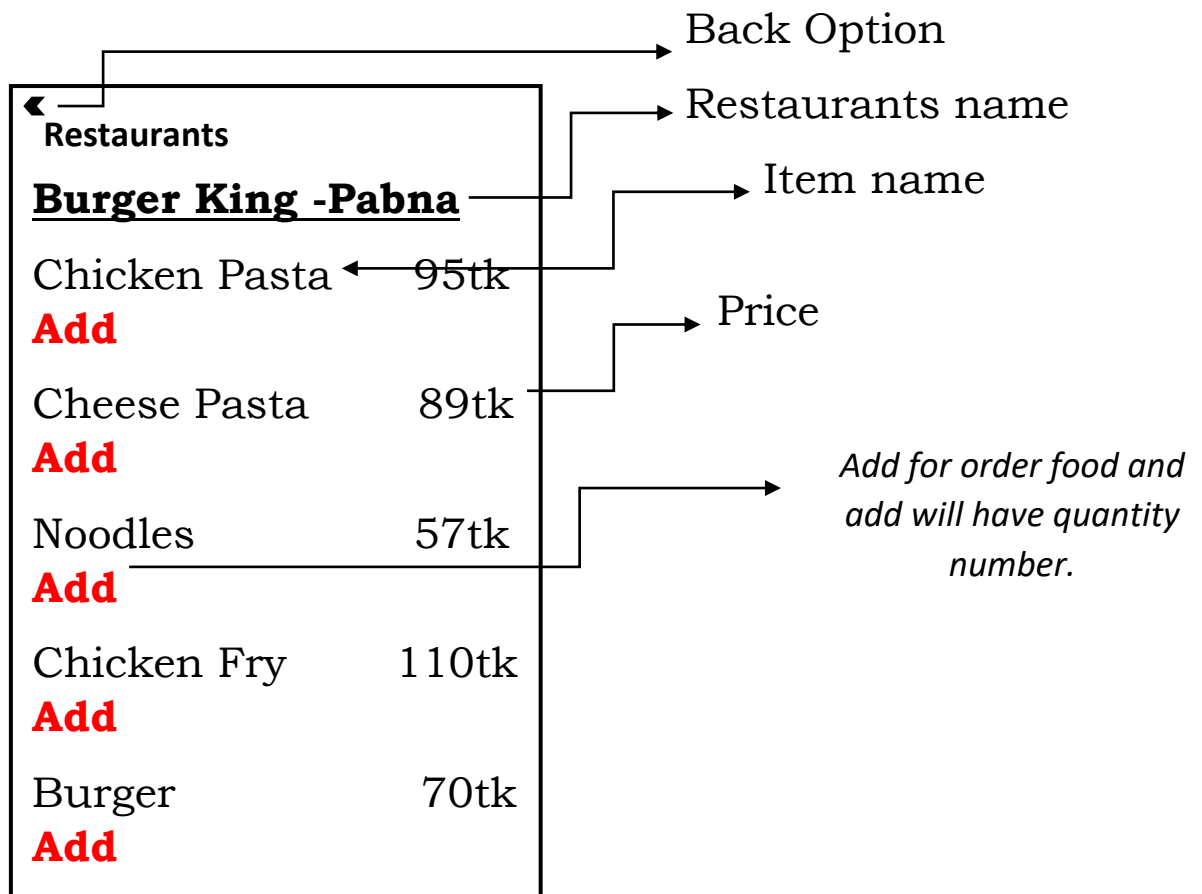

3. Homepage

- Homepage shows featured content
- Featured content will be based on the number of hotels or restaurants, popular food, Login/Registration etc.

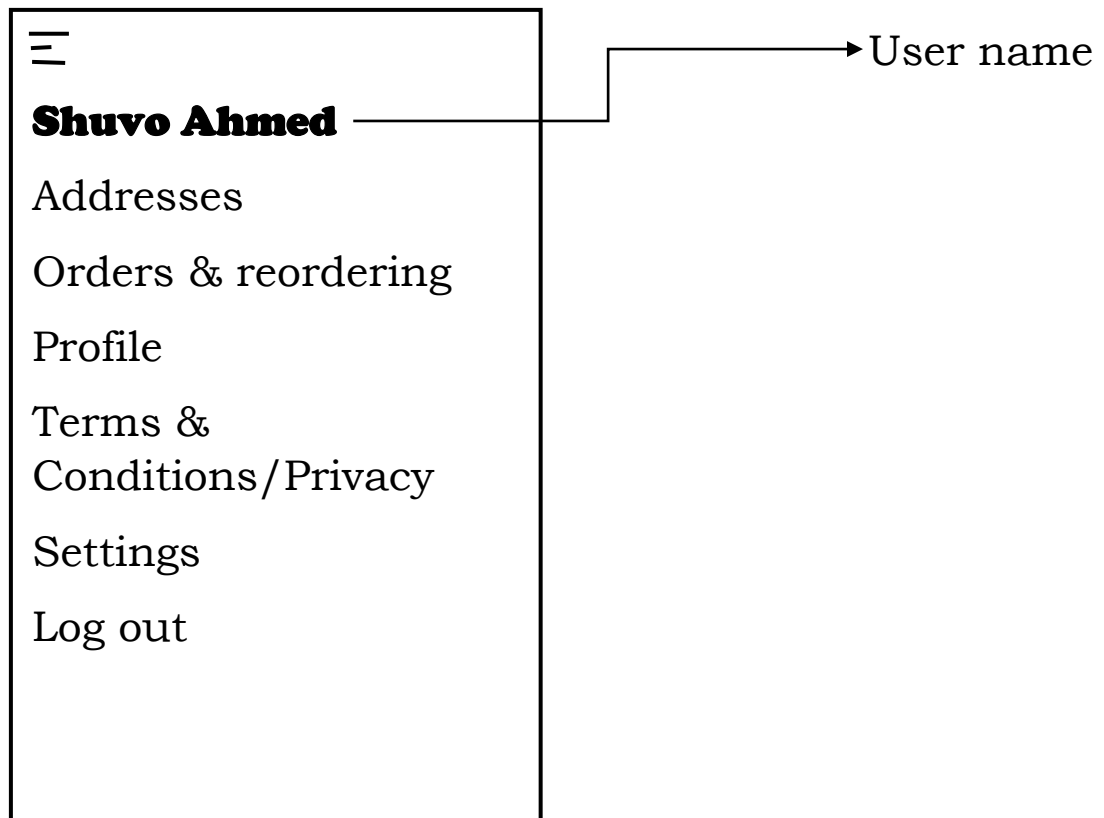

4. Restaurants view

- Users can choose food to order.
 - Same view for all restaurant profiles.
 - Different restaurant profiles will have a different type or the same type of food.
 - Different food will have different prices.
- food, Login/Registration etc.

5. Navigation

- Simple
- Same menu for Personal Profile.

6. Personal profiles/User Profiles

User profile form

- Name
- Address
- Mobile number
- Country
- City
- Year of birth

Registrat
Name:_____
Address : _____
Mobile Number: _____
Country:_____
City:_____
Date of birth:_____

7. Payment Method

- Users pay their bills by using the cash-on-delivery method.

8. Development

- I will try to develop the app in the future.
- I will try to develop the app for **iOS** in the future.
- In future I will develop payment method.
- The login method will be updated later.

9. Conclusion

It will be a wonderful learning experience for me while I work on this project. The android app is very easy to use, so any user can use this frequently. So, I can hope that my software will be very popular in the future.
